AMBIENT ACCENT LIGHTING**SABRE**

AUTO LEVELING SYSTEM

Each Sabre is equipped with a fully interactive touch screen, two independently driven front landing gear legs, and two rear leveling jacks.

This system offers owners the ability to auto level the RV without the use of leveling blocks or the need to manually deploy jacks one at a time.

The easy-to-read, interactive touch screen operates all leveling jacks manually or just press OK and walk away!

- Fast & lightweight system
- User-friendly touchpad, with both auto and manual mode
- Large footpads
- Consistently levels and stabilizes
- Auto reconnect and hitch height memory allows for hassle-free hookup to tow vehicle
- Fully interactive touch screen
- Manual overrides on all jacks

SABRE

10

VACUUM BONDED LAMINATED WALLS

- Each sidewall and slide wall is cured 15-18 minutes at 144 tons of pressure to provide a stronger bond than our competitor's pinch rolling process
- Double-welded aluminum sidewalls and slides are specifically engineered for each floor plan
- Electro-Galvanized Steel Backers (EGS) are laid in place prior to lamination to provide better screw retention
- Each wall is tested for thorough glue coverage and bonded strength

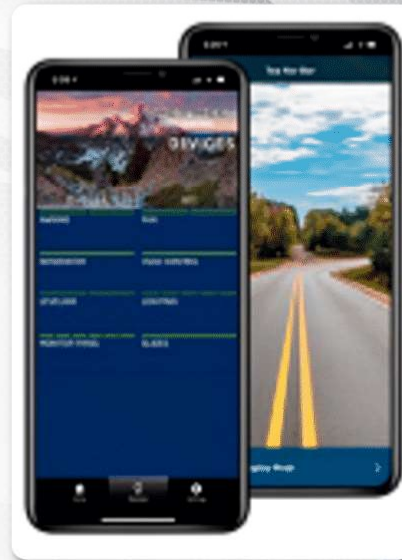

SABRE

11

BACK-UP CAMERA SYSTEM

- Your Sabre comes with our pre-installed backup camera system for added safety and security.
- For your convenience, our backup camera connects directly to your ONE Control mobile app.

SABRE

12

SOLAR REFLECTIVE WINDOWS

Solar Reflective Glass Windows provide outside views and more privacy.

- Keeps interior cool by blocking heat from the sun
- 3mm thickness
- Reflective glass provides a beautiful aesthetic compared to clear or tinted glass

SABRE

13
